Questions: Effie Alofoje-Carr @ inghamllg@gmail.com

Presented by: Nancy Roberts, RN, CCE, CBC

Purpose: This conference will assist the attendees in the understanding, identification, and treatment for women who experience a Perinatal Mood Disorder so they can most effectively and holistically support and assist the affected mother and her family toward wellness.

Objectives:

- Differentiate during client interview which Perinatal Mood Disorder is displayed.
- Describe interview techniques for counseling clients with PMD Risk Factors and/or symptoms with video instruction.
- Discuss recommended PMD treatment options and local resources with clients in a role-playing setting.
- Discuss various PMD case presentations and scenarios with active audience participation.
- Review screening instrument results with client and follow-up recommendations.
- Discuss how breastfeeding would impact a client's treatment options and self-care plan.
- Discuss interview strategies with minority women.
- Discuss PMD prevalence and presentation in Fathers with PSI video.
