¹ The year referenced as 2000 and 2010 represent rates derived from three-year averages 1998-00 and 2008-10 respectively.

² A ranking of 1 means a county has the “best” rate among Michigan counties. At least 80 counties were ranked on all indicators except for teens already mothers (70).

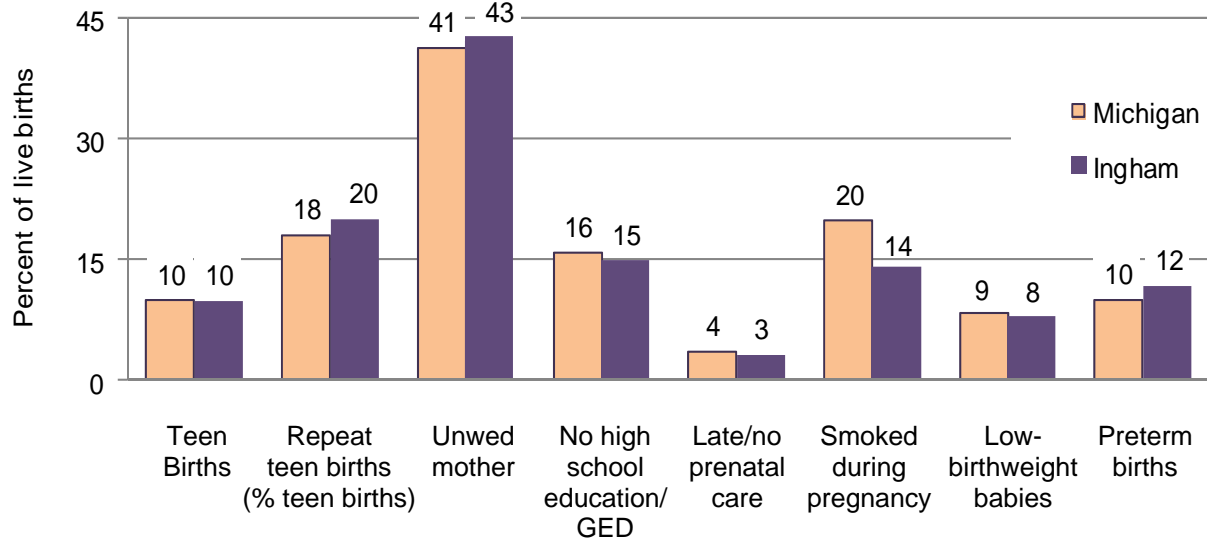

*No data available.

** 2008-00 average — data are not consistent with 2000 after 2007.

Note: A decline represented by a negative percentage change is good news as all these measures indicate risk.

“NOT white non-Hispanics” includes African Americans, Hispanics, American Indians, Asians, Pacific Islanders, and other non-Hispanics.
