

## **11/10/21 Ingham GSC Meeting**

### **Outcome Group: 1 “*Children are born healthy.*”**

#### **Outcome Group Members:**

#### **Activities:**

- 1.) Now that information about health care benefits (including resources and support services for prenatal health care) has been gathered and sorted, communicate, and share that information on social media outlets with families:
  - Work with GSC webmaster to place information on the GSC website.
  - Work to translate and provide information in multiple languages.
  - Inform and communicate to GSC members and community organizations this information is located on the Ingham GSC website.
- 2.) Regularly update and review the content of health care, support services, and resources information on the Ingham GSC website (monthly, bi-monthly):
  - Contact OB/GYN providers about hours of operation, location, and types of insurance accepted to update the medical provider list.
  - Contact or visit Medicaid insurance website to update information about transportation provided to clients for medical appointments.
  - Add other information based upon the needs of the community.

- **How does the spotlight align with your Outcome group Activities? (Whiteboard)**
  
- **What progress has been made on Activities since the October GSC meeting?**
  - Jessica working on updating parent resource guide on GSC website (including HV programs); adding ‘academic supports’ section for educational outcomes for more SA kids
  - Met to look at GSC website overall to clean up all resources and other materials/handouts
  - ACES grant at CR-extension due to COVID; printed materials for providers who see patients at CR (English and Spanish) to improve flow to processes
  
- **What are next steps to take on Activities by the December GSC meeting?**
  - Find out if there’s any financial resources to support items that impact infant health (for ex: pack and plays for families who don’t qualify for them with other community partners).
  - How to be the healthiest as possible at birth-look at outcomes/indicators and research (Lisa)
